

This hobo was packed inside the box used to ship the four pre-measured aliquots on 09/24/12. Test substance temperature recording started at UH, St John Room 006 on 09/24, to FedEx and continues to the storage facility at the experiment station (neighbor island). It also accompanied the test substance out to the test plot for each application. It includes temperature at the pesticide storage facility at the experiment station between applications. It was hand carried back to UH for download. *QR 10/23/12*
